Introducing the 1st multidisciplinary guide to review articles

INDEX TO SCIENTIFIC REVIEWS™

Now you can easily find review articles on any subject in science. Each year the *Index to Scientific Reviews (ISR™)* will index over 16,000 reviews selected from more than 2,700 of the world's most important journals.

Broad Coverage
Over 100 disciplines in every area of science are covered:

- **Agricultural, Biological & Environmental Sciences**
- **Engineering, Technology & Applied Sciences**
- **Medical & Life Sciences**
- **Physical & Chemical Sciences**
- **Social & Behavioral Sciences**

So you won't have to go through separate references to locate review articles for subjects in any of these areas. With one index—the *ISR*—you can cross disciplinary lines and retrieve these key articles no matter where they were published in the literature. The *ISR* will even cover the literature published in quarterly and annual "review" publications (e.g., *Annual Review of Genetics).*

Effectively Indexed
The *Index to Scientific Reviews* makes it easy to find the review articles you need. Search by authors, title words and phrases, and organizations. Or use the *ISR*'s citation index—it lets you start a search with previously published material relevant to a subject and find more recent articles through citation relationships.

Highly Current
The *ISR* indexes the review literature on a calendar year basis. A soft-bound semiannual issue (covering January to June) will be available each September, and a hard-bound annual cumulation will appear the following April. So you can find new articles while they're still new.

What's It To You?
The *ISR* is a quick and easy way to find: 1) summaries of knowledge in fields unfamiliar to you, 2) those key articles you need to start a really thorough literature search, 3) the most recent review articles on any subject in science.

For More Information . . .
The first *ISR* annual cumulation (covering the 1974 literature) will soon be out, so get the full story on the *Index to Scientific Reviews* now. Just fill in the coupon, and mail it today.

Zum 70. Geburtstag von A. Unsöld

Problems in Stellar Atmospheres and Envelopes

Editors: B. Baschek, W. H. Kegel, G. Traving

With contributions by B. Baschek, K.-H. Böhm, E. Böhm-Vitense, K. Hunger, W. H. Kegel, K. Kodaira, D. Labs, L. Oster, D. Reimers, G. Traving, V. Weidemann

75 figures. XIX, 375 pages. 1975
Cloth DM 48,—; US $20.70
ISBN 3-540-07092-3

This volume — dedicated to A. Unsöld on the occasion of his seventieth birthday — contains review-like articles on current topics in the field of stellar atmospheres and envelopes. A first group deals with spectroscopic problems of the sun and special groups of stars (Labs, Energy Flux of the Sun; Böhm-Vitense, Model Stellar Atmospheres; Hunger, Helium Stars; Baschek, Abundance Anomalies in Early-Type Stars; Kodaira, A-Type Horizontal-Branch Stars; Wiedemann, White Dwarfs). Some further articles are concerned with the outer parts of stars and with extended objects (Böhm, Herbig-Haro Objects; Reimers, Mass Loss from Red Giants; Kegel, Cosmic Masers; Oster, Stellar Radio Emission). In a final paper a generalized transfer equation is discussed (Traving, Turbulent Line Formation).

A. UNSÖLD

Der neue Kosmos

2. stark erweiterte Auflage
167 Abbildungen. XII, 438 Seiten. 1974
Gebunden DM 38,—; US $16.40
ISBN 3-540-06718-3
(1. Auflage erschien als Band 16/17 der Heidelberger Taschenbücher)

Der neue Kosmos gibt eine Einführung in die Astronomie und Astrophysik sowie die neueren Gebiete der Weltraumforschung und Kosmologie für angehende Astronomen und Physiker, für Wissenschaftler benachbarter Gebiete und nicht zuletzt für einen weiten Kreis wissenschaftlich interessierter Leser.
Die Neuauflage trägt den geradezu explosiven Fortschritten der Forschung seit 1966 Rechnung, so daß fast ein neues Buch entstanden ist: Mondlandungen, Planetensonden und Kontinentalverschiebung; Pulsare, Quasare und Schwarze Löcher, um nur einige Stichworte zu nennen. Insbesondere sind die Abschnitte über Galaxien und ihre Evolutionen, über Kosmologie und besonders die Entstehung und Entwicklung des Planetensystems, der Erde und des Lebens weitgehend neu bearbeitet. Dabei wurden auch viele Abbildungen neu aufgenommen bzw. durch neue ersetzt. Ein erheblich erweitertes und revidiertes Literaturverzeichnis dürfte das Eindringen in die weiterführende Literatur erleichtern.
English edition in preparation

A. UNSÖLD

Physik der Sternatmosphären

mit besonderer Berücksichtigung der Sonne

Berichtigter Nachdruck der 2. Auflage
257 Abbildungen. IX, 866 Seiten. 1968
Gebunden DM 184,—; US $79.20
ISBN 3-540-04370-5

Inhaltsübersicht Die Sternatmosphäre im thermischen Gleichgewicht. Kontinuierliches Spektrum und Aufbau einer Sternatmosphäre. Messung der Intensitätsverteilung in den **Fraunhofer**-Linien. Die Entstehung der **Fraunhofer**-Linien. Physik der Sonne. Radiofrequenzstrahlung und kosmische Ultrastrahlung.

A. UNSÖLD

Sterne und Menschen

Aufsätze und Vorträge

16 Abbildungen. VIII, 170 Seiten. 1972
Gebunden DM 35,—; US $15.10
ISBN 3-540-05607-6

In der vorliegenden Sammlung von Vorträgen und Aufsätzen steht im Mittelpunkt die Frage nach den Hintergründen der Entwicklung der modernen Physik und Astronomie. Welche Persönlichkeiten haben sie getragen? Wo lagen die großen Gedanken und Wendepunkte der Forschung und wie sind sie in Erscheinung getreten? — Eine zweite Gruppe von Vorträgen gibt in gemeinverständlicher Weise Einblick in einige Bereiche der astrophysikalischen Forschung, in denen der Verfasser lange Zeit mitgearbeitet hat. Hier stehen im Mittelpunkt Fragen nach dem Aufbau der Sternatmosphären, der chemischen Zusammensetzung der Himmelskörper und der Evolution kosmischer Materie.

ASTRONOMY AND ASTROPHYSICS

A European Journal

Vol. 41 Nos. 3/4 Last Issue of this Number **July (I/II) 1975**

Stars and Stellar Evolution

Snijders, M. A. J., Lamers, H. J. G. L. M.: Observations and Theory of Mg II Lines in Early Type Stars. II. Theory and Predicted Profiles 245

Lamers, H. J. G. L. M., Snijders, M. A. J.: Observations and Theory of Mg II Lines in Early Type Stars. III. The Observations and a Comparison with the Predictions 259

Boury, A., Gabriel, M., Noels, A., Scuflaire, R., Ledoux, P.: Vibrational Instability of a 1 $M_\odot$ Star towards Non-radial Oscillations 279

da Silva, L: The Study of HR 3018, HD 91324 and α Crv and Its Implication for the Age-abundance Correlation of the Neighbour Stars 287

Zahn, J.-P.: The Dynamical Tide in Close Binaries 329

Shaw, J. S.: Four-color and H β Photometry of β Cephei Stars and Their Location in the Hertzsprung-Russell Diagram 367

Flower, P. J.: Bolometric Corrections for Late-type Giants and Supergiants 391

(RN) *Andersen, B. N., Pettersen, B. R.:* Search for Stellar Flare Activity 459

Galactic Structure, Stellar Dynamics, Interstellar Matter

Smith, H., Jr.: The Diameter Function for Supernova Remnants and Their Evolution 273

Velusamy, T., Kundu, M. R.: Depolarization of Five Supernova Remnants: Internal and External Faraday Effects 307

Fenkart, R. P., Wagner, R.: An Empirical Determination of the Star Density in the Galactic Halo with Three-colour-photometric Methods in the Direction to M 13 315

Hartl, H.: UBV-photometry of Three Fields in Cygnus 321

Lindemann, E., Burki, G.: Rings and Chains in Simulated Stellar Fields 355

Gail, H.-P., Sedlmayr, E.: On the Charge Distribution of Interstellar Dust Grains 359

Rickard, J. J.: A Study of the Interstellar Gas between the Sun and the Sagittarius Arm 403

Moffat, A. F. J., Vogt, N.: The Bright Star Cloud in Sagittarius at $l = 12°$, $b = -1°$ 413

Lefevre, J.: Thermoionic Emission from Hot Grains 437
